

## **Inspira Assessment** **Secure, Scalable, Reliable**

Author, deliver, grade and provide rich feedback entirely on screen. From secure, high-stakes summative exams to formative assessment for learning with multiple attempts, your candidates will benefit from a user-friendly interface that lets them concentrate on their performance, not the technology or worrying about internet connectivity.

## **How it Works**

---

### **Author**

Choose from a wide range of automatically and manually marked question types including traditional essay and numeric simulation.

### **Deliver**

Single or multiple attempts, or deliver as an element within an overarching assessment. Varied integrity settings - including locked down, proctored and similarity checking.

### **Monitor**

Track engagement and monitor your candidates during their assessments. Extra time can be added at an individual level before and during an assessment with ease.

### **Grade and Feedback**

Multiple grading workflows ensure candidates are graded fairly and in accordance with your regulations. Text and audio feedback options at question, submission and cohort level.

### **Analytics**

Psychometric and assessment-level data to allow analysis of your candidates and questions. Export data in CSV and JSON format to form a wider picture of efficacy.

# Why Choose Inspera Assessment?

---

## **Offline Resilience**

Let your candidates focus on their assessment, not their internet connection. Inspera keeps working even if the internet doesn't.

## **Efficient**

A workflow designed for assessment. Use psychometric and assessment data to drive improvements in your questions and candidates.

## **Innovative**

Take your assessments to the next level with question types, layouts and feedback options designed to support your pedagogical needs.

## **Inclusive**

Customize environment, time settings and accessibility tools to suit all your candidates with their varying needs.

## **Cost Effective**

Eliminate paper, transport costs, and the risk of losing submissions, all while scaling to suit your cohort size. Allow your candidates and graders to take and mark their assessments in a location of their choice.

## Optional Plug-Ins

---

### **Inspera Integrity Browser**

Enhance the security of your remote exams and prevent content leakage. Choose the resources and software candidates can access during assessments.

### **Inspera Scan**

Provide your candidates with the ability to produce test submissions that they may find difficult to produce purely on screen, such as math working, diagrams and pictures to be scanned in bulk to appear on screen for grading and feedback together with any answers they typed.

## Seamless Integration

---

Inspera Assessment can be standalone, integrated via LTI to your LMS or with your Student Information System via APIs.

## Contact Us
