Creative and engaging toolbox for learning powered by AI

-  Include everyone in learning
-  AI-structured documentation of student competencies and auto-generated testing
-  Real-time insights into learning progress and authentication of original work
-  Integrated with Microsoft and Google - works on all devices
-  Formative feedback and assessment using AI
-  Secure, GDPR-compliant data analysis

## OUR TOOLS:

**Colab**  
This is a diverse tool, perfect for including all in interactive presentations, conducting surveys and assessments.

**Storylab**  
Tell your unique multimodal story with the help of millions of open resources.

**Idealab**  
Visualize great ideas and concepts using our mind map tool.

**Medialab**  
Let students showcase their competence with engaging and creative films, podcasts, or animations.

**Mylab**  
The best tool for planning, organizing learning and formative assessment.

**Learnly**  
Our AI-assistant Learnly helps to create content, translate, adapt, analyze, summarize, and give feedback. He is also available in Microsoft and Google office tools.

learnlab.net

**Ecosystem**  
Learnlab works best when utilizing the cross-apps functionalities and connecting with platforms like Microsoft Teams and Google Classroom. All learning materials can be easily edited and shared among teachers.

**Students as producers**  
Learnlab fosters progressive pedagogy by empowering student voices, encouraging creation, and promoting reflection on their work throughout the learning process.

**Use of AI to enable inclusion**  
Include all learners in collective learning experiences regardless of language and competence level.

**Formative assessment with AI**  
Learnlab provides you with AI tools for formative assessment, summaries, improvement tips, self-assessment, and feedback from teachers based on the curriculum. Allows the teacher to auto-generate tests based on the students' work.

**GDPR compliant**  
We follow WCAG standards and ensure GDPR compliance. Our platform is browser-based, secure and available on all devices.
